SmartControl™
Hyperion Static Control System

Introduction to SmartControl™

Hyperion™ SmartControl allows for remote monitoring and performance adjustment of Meech's innovative Hyperion static control range.

A single SmartControl has capacity for up to six devices to be connected, with expansion units available to allow connection of a greater number of devices.

How does SmartControl work?

- Meech Hyperion devices are connected directly to the SmartControl unit.
- Operating performance information is sent via the chosen method (LAN, WAN, Ethernet etc.) to a selected local display unit, such as a mobile phone, tablet, touch screen or monitor.
- The operator can access the performance information and amend the operating parameters to achieve maximum productivity and quality output.

Why choose SmartControl?

SmartControl has been designed with key features to benefit busy industrial environments:

Remote Monitoring and Control

- Make quick and easy changes to connected devices
- Advanced productivity and quality control on production lines through fast, accessible monitoring
- Remote monitoring and control through mobile devices – allowing control wherever you are

PLC Integration

- Compatible with Siemens and Modbus software
- Plug-and-Play: fast and easy installation into current operations for immediate effect

User Friendly Interface

- Clear and easy to use
- Requires no training

Connections

- Only one SmartControl is needed for the central control of six Hyperion devices
- More devices can be added via expansion units

Sensor Compatible

- Feedback sensor compatible
- For more accurate neutralisation of all charges on the material

Two Configurations

- Two configurations available: a single unit or an enclosed SmartControl and touchscreen system

SmartControl Configurations

Offering	Version	Options
SmartControl Only*	Local Area Network (LAN)	Wide Area Network (WAN)**
	PLC Connection	
Enclosed SmartControl and Touchscreen*	Local Area Network (LAN)	Wide Area Network (WAN)**
	PLC Connection	

*Optional expansion units available with every model

**WAN includes one year subscription

All you need, from the best in the business

Meech is also a leading provider of:

- **Industrial Static Control Systems** – Eliminating unwanted static or creating a controlled static charge in industrial processes can increase productivity, reduce waste and enhance quality.
- **Web Cleaning Systems** – Typically used within the printing and packaging industries to remove contamination, improve print quality and increase productivity.
- **MAT Air Technology Equipment** - Industrial compressed air products that are energy efficient, reduce noise levels, cut costs and provide efficient cooling.
- **Surface Cleaning Systems** - IonWash, IonRinse and JetStream Air Knife Systems – Energy efficient 3D surface cleaning systems that are used for contamination and surface moisture removal.
